DETAILED ACTION

1. Claims 1-4 are pending in this application.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1-4 are rejected under 35 U.S.C. 102(e) as being anticipated by Booman (6,216,169).

4. As to claim 1, Booman teaches the invention as claimed including a method for automated follow-up of a request comprising the steps of:

generating a request with a deadline at a sender and recording that request (col. 9, lines 36-37 and col. 10, lines 38-40);

sending that request with a deadline message to receivers (col. 9, lines 36-43);

receiving said request and deadline at the receivers (col. 9, line 64);

determining at the receivers when the request is done (col. 10, lines 39-44);

and sending notice to sender when request is completed (col. 10, lines 1-2).

5. As to claim 2, Booman teaches the invention as claimed including that the sender determines if a done request is completed before said deadline and generates a message if it has not been completed by the deadline date (col. 10, lines 41-51).

6. As to claim 3, Booman teaches the invention as claimed including that the sender sends a message to said receivers if the deadline date has not been met (col. 10, lines 48-50).

7. As to claim 4, Booman teaches the invention as claimed including that the sender also sends a second deadline date with said message (col. 10, lines 47-50).
